

Kindergarten Screening Policy

2205

School Union #93 has the responsibility to schedule kindergarten screening dates in each school during the months of April and May to measure academic achievement levels, and speech and language skills and to identify exceptional students and students at risk of school failure. The screening also serves as an opportunity to review current medical data and to register students for kindergarten. Only qualified staff will administer the Developmental Indicators for the Assessment of Learning (DIAL). The data collected and analyzed will assist in developing individualized programs for our kindergarten students.
